

Announcement for Master students

Dear students, starting from March 11 2024, 0:00 am, you can register for your modules till March 20 2024, 0:00 am.

Please note that the official registration phases (in German "Belegungsphasen") mentioned on the homepage of Klips often do not apply to the Faculty of Medicine! The dates for the Neuroscience course are entered individually, so that only the above-mentioned registration phase counts!

For you to be able to see the dates of all modules in the overview, a timetable was uploaded on the website. You can find it on the subpage "Students". If you scroll down, you will find the category representative schedules (<https://neuroscience.uni-koeln.de/en/students>). Please note that we reserve the right to make changes, and only the information on Klips 2.0 is official! The timetable overview is for orientation only!

We kindly ask for understanding that for some modules, we only received general time slots. More detailed schedules will be sent to the participants shortly before or at the beginning of the course.

Which courses are offered?

On Klips you will find two different module types: Advanced modules (in German "Aufbaumodule") and Supplementary modules (in German "Ergänzungsmodule"). By clicking on "Advanced modules" you will find a list of numbered advanced modules, divided into subcategories of a, b, c etc. By clicking on one of those subslides, you will see if a module is already inserted into this category. More explanation about the subslides and on how to log in for courses on Klips is described on the website <https://neuroscience.uni-koeln.de/en/studies/students> under "General information for Master's students".

All detailed information about the modules' schedules can be found via the course number in Klips. This semester, we will offer the following modules from which you can choose:

- Advanced module 1: **Computational Neuroscience** (12 CP)
space-limited: 3 seats
Klips: Course Number: 14912.3022
- Advanced module 2: **Neural Function I** (12 CP)
space-limited: 4 seats
Klips: Course Number: 14912.3030
- Advanced module 2: **Experimental and Translational Neuroimaging** (12 CP)
space-limited: 6 seats
Klips: Course Number: 16896.0000-16896.0002
- Advanced module 4: **Neurobiology in Drosophila** (12 CP)
space-limited: 9 seats
Klips: Course Number: 14912.3045
- Advanced module 4: **Neural Function II** (12 CP)
space-limited: 2 seats
Klips: Course Number: 14912.3040

- Advanced module 4: **Neurophysiological and Genetic Approaches for Brain Function Analysis** (12CP)
space-limited: 4 seats
Klips: Course Number: 14912.3041
- Advanced module 7: **Retinal Immunology** (6 CP)
space-limited: 4 seats
Klips: Course Number: 15019.0004
- Advanced module 10: **Animal Models in Neuroscientific Research** (9 CP)
space-limited: 7 seats
Klips: Course Number: 15110.0000
- Advanced module 11: **Clinical Neuroscience I** (6 CP)
not space-limited
Klips: Course Number: 15120.0002-15120.0003
- Advanced module 13: **Neurological and Psychiatric Diseases** (6 CP)
space-limited: 10 seats
Klips: Course Number: 15111.0000-15111.0001
- Advanced module 15: **Quantitative Microscopy** (6 CP)
space-limited: 4 seats
Klips: Course Number: 15078.0000-15078.0002
- Advanced module 16: **Neurosurgical Aspects in Neuroscientific Systems** (6 CP)
space-limited: 6 seats
Klips: Course Number: 15109.0000-15109.0001

Important information about individual modules:

Module catalogues for each module containing more information about content, learning methods, requirements and lecturers are found on the website: <https://neuroscience.uni-koeln.de/en/studium/master/modules>

- **“Animal models in Neuroscientific Research”** consists of one part in the winter semester and one in the summer semester. You need both parts to get the CP of the module!
- **“Quantitative Microscopy”, “Retinal Immunology”** and **“Neurosurgical Aspects in Neuroscientific Systems”** are offered both in Winter and Summer Term.
- Some modules overlap. You cannot select two modules that overlap on more than one date.

How does the registration for space-limited modules work?

As you can see, all modules are space-limited apart from Clinical Neuroscience I.

All space-limited modules will be selected via Mr. Samir Delonge. (-> You will see a comment in Klips) Write him an e-mail with your name, your matriculation number, your semester, and your course choice: samir.delonge@uk-koeln.de.

(For students in higher semesters: Please also give the info, which sub slides on Klips you have already occupied, so we can insert you into a free one! You can find that information in your Klips account)

Mr. Delonge will inform you at the beginning of the semester whether you will have received a place and will add it to Klips. Anyone can choose space limited modules. Higher semesters have priority. For students of the same semesters, the lot can decide. The other modules, you will select via Klips.

How do I register for courses via Klips?

All non-space limited modules are selected via Klips. This will be explained in detail. Please read it through completely. Each advanced module is defined by three factors: Firstly, course type, secondly, examination type, and thirdly, CP.

The courses are assigned to the modules according to the parameters. Since there are courses with the same factors, which are accordingly assigned to the same advanced module, there are sub slides for each advanced module (Advanced module 8, sub slide "Advanced module 8a", sub slide "Advanced module 8b", sub slide "Advanced module 8c" etc.).

You can occupy each sub slide only once! Therefore, make sure that the sub slide is free and has not yet been occupied by other modules! For students in the first semester, all sub slides are still free. If students of the higher semesters have already taken 8a, then please take a sub slide that is free, e.g., 8b.

Example:

Clinical Neuroscience I has a lecture and practice part as course types and a presentation as examination and it counts 6 CP. It is anchored under Advanced Module 11. Molecular Neuroimmunology also has a lecture, a practice part, a presentation and 6 CP and is therefore also anchored under Advanced Module 11. In order to be able to take both modules, you have to select them in two different sub slides, for example Clinical Neuroscience I in 11a and Molecular Neuroimmunology in 11b.

It is also important to remember that courses always consist of several course parts. In Clinical Neuroscience I, it is a lecture and a practice part. You must select both in Klips - and both in the same sub slide!

Important information about the Master's Degree

As you can see in Klips you need 66 CP from the advanced modules, 2 supplementary modules and the master thesis to complete the master. Explanation: You need either exactly 66 CP or a whole module more from the advanced modules. **That means 66 CP works, 72 CP works, 75 CP works, 78 CP works, but 69 CP e.g. does not work!** In other words: If you choose a module with 9 CP you need another module with 9 CP to get exactly 66 CP!

Students who started the degree while the old examination regulations still applied (first semester before WS 15/16) can view the courses via Klips without an account. They also have to make their choice manually via Mr. Delonge.
